

# SELENIUM FAQ'S

---

## Part-8

## Ques.166. What is a Framework?

---

- A framework defines a set of rules or best practices which we can follow in a systematic way to achieve the desired results. There are different types of automation frameworks and the most common ones are:
- Data Driven Testing Framework
- Keyword Driven Testing Framework
- Hybrid Testing Framework

## Ques.167. Have you created any Framework?

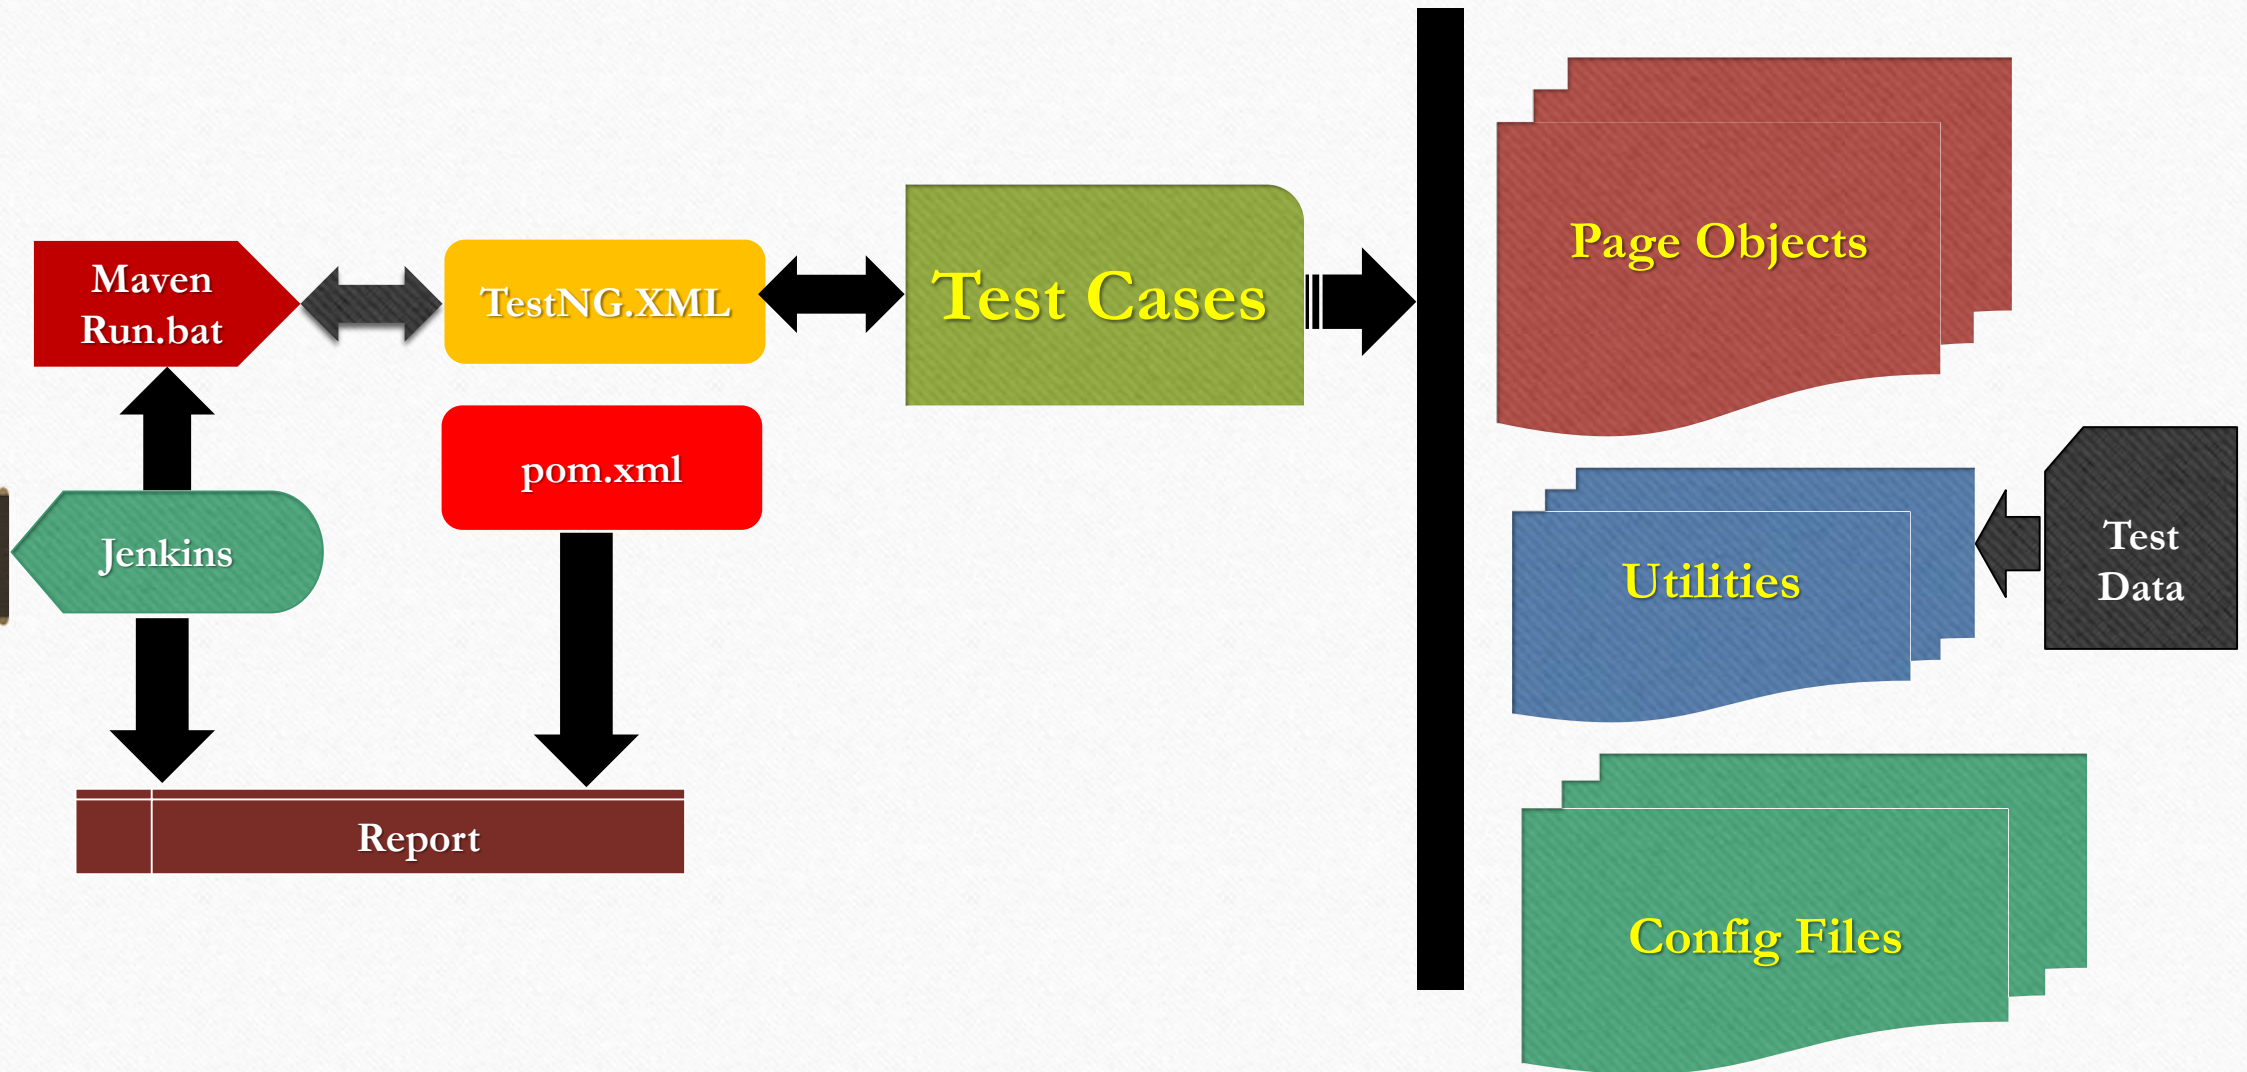

---

- If you are a beginner: No, I didn't get a chance to create a framework. I have used the framework which is already available.
- If you are an experienced tester: Yes, I have created a framework. Or I have involved in the creation of the framework.

## **Ques.168. Can you explain the Framework which you have used in your Selenium Project?**

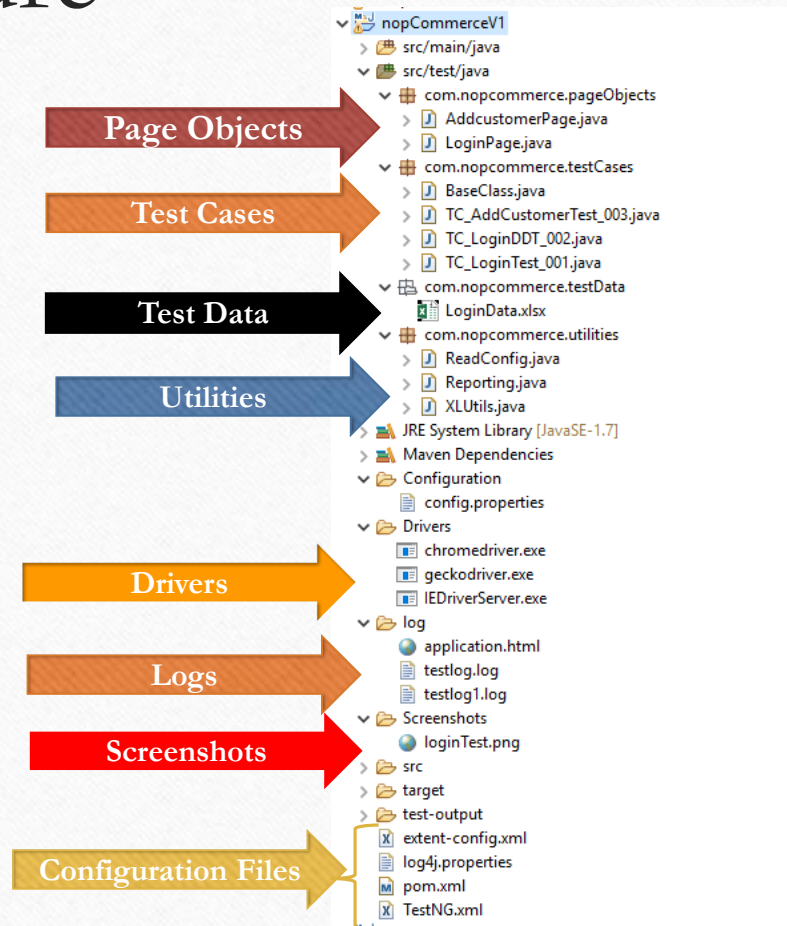

---

- Here you have to clearly explained each component of Framework.

# Framework Structure

## Ques.169. Why do you prefer Selenium Automation Tool?

---

- Free and open source
- Have large user base and helping communities
- Cross browser compatibility
- Platform compatibility
