If you want to be first in line to experience new features, download our latest [Canary builds](#).

Note: If you are using windows then there is an option for downloading for 32 bit system and 64 bit system. If you are using 64 bit windows then select x64 and if you are using 32 bit system then select x86. Default value is x64.

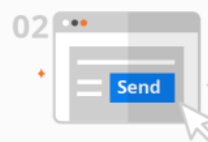

2) Choose the *Operating System* on which you want to install PostMan and click on “*Download*” button. Since I have got Windows 64-bit machine, I am going to install *x64-Windows*.

3. Once you download the exe file, you will be need to install the application. Since I am using Chrome browser, the downloaded exe will appear at the bottom left of the browser.

Your download will begin automatically in a few seconds...

4) Click on the *exe file* to install it on the system. First it will install the POSTMAN application.

5) There is no further steps for installing. After completion, it will automatically start opening the PostMan tool.

Distorting space-time continuum...

6) Once you have the application window up, click on *Take me straight to the app. I'll create an account another time* as highlighted. Alternatively, you can sign up with google but it does not matter at present.
